Professional Summary

Oracle Certified Java SE Programmer with 10 years of experience in Java technical Production Support, Site Reliability Engineering, and DevOps practices. Proven track record in delivering scalable and reliable solutions, automating monitoring systems, and leading global support teams. I am skilled in Core Java, SQL, Unix-based systems, CI/CD pipelines and cloud technologies with certifications in Azure and AWS. Adept at improving system uptime, reducing MTTR, and driving operational efficiency through automation, observability, and continuous learning.

Core Competencies

Incident & Problem Management | Site Reliability Engineering | Root Cause Analysis | DevOps- CI/CD (Jenkins, Git) | Monitoring (AppDynamics, Datadog, Kibana) | Cloud Platforms (AWS, Azure) | Java & SQL | Unix & Shell Scripting | OpenShift Container Platform |Kubernetes | Autosys | Performance Optimization | Team Leadership | Change & Release Management | ITIL Processes

Technical Skills

Programming & Scripting: Core Java, SQL, Unix/Shell scripting
Cloud & DevOps: AWS (Certified), Microsoft Azure (Certified), Jenkins, Git, ServiceNow, OpenShift, Kubernetes
Monitoring & Databases: AppDynamics, Datadog, Kibana, Autosys, Oracle 19C

Experience

Capgemini – Senior Consultant / Production Support Lead (Oct 2019 – Present)

- Led and mentored team of 19 engineers, driving collaboration, knowledge sharing, and ensuring 99.99% uptime for Discover Digital Xchange platform, enabling secure card provisioning and tokenization for major E-Wallets (Apple Pay, Samsung Pay, Android Pay) to facilitate seamless contactless payments.
- Implemented automation and system health checks, reducing manual intervention by 40%, and developed observability dashboards (AppDynamics, Datadog, Kibana) cutting MTTI by 35%.
- Acted as Incident Commander during high-severity outages, managing RCA and post-incident reviews, participated in CAB meetings, authored change tickets, and validated deployments for compliance.
- Collaborated with engineering teams to optimize CI/CD pipelines, improve deployment efficiency, and enhance system performance; maintained SOPs and knowledge base for consistent support delivery.
- Developed project plans, tracked KPIs for on-time delivery, ensured adherence to security protocols through patching and risk assessments, and provided training to enhance operational readiness.

Capgemini – Associate Consultant (Aug 2016 – Sep 2019)

- Delivered end-to-end application support for fraud detection and compliance platform integrating four applications (Fraud Alert, Guardian, Verify+, RCT) for real-time and batch processing to detect fraudulent transactions and ensure Discover Network compliance
- Resolved critical production incidents with 99% SLA adherence, coordinating with onshore teams to minimize business impact and ensure system stability.
- Developed preventive scripts and automated reporting, reducing manual effort and improving accuracy, enhanced monitoring and alerting processes for better operational efficiency.
- Managed Autosys jobs, validated deployments per CAB protocols, and mentored new team members—driving knowledge sharing and continuous improvement across support operations.

Education

- M.Tech – Engineering Management, Manipal Institute of Technology (2015)
- B.Tech – Information Technology, St. Joseph Engineering College (2013)

Certifications

AWS Certified Developer | AWS Solutions Architect | Oracle Java SE | Microsoft Azure Fundamentals

Awards

Customer Delight | Rising Star | GEM Award | WOW Award | Certificate of Appreciation
