Professional Summary

Oracle Certified Java SE Programmer with 10 years of experience in Java development, Technical Production Support, Site Reliability Engineering, and DevOps practices. Proven track record in delivering scalable and reliable solutions, automating monitoring systems, and leading global support teams. I am skilled in Core Java, SQL, Unix-based systems, CI/CD pipelines and cloud technologies with certifications in Azure and AWS. Adept at improving system uptime, reducing MTTR, and driving operational efficiency through automation, observability, and continuous learning.

Core Competencies

Incident & Problem Management | Site Reliability Engineering | Root Cause Analysis | DevOps | CI/CD (Jenkins, Git) | Monitoring (AppDynamics, Datadog, Kibana) | Cloud Platforms (AWS, Azure) | Java & SQL | Unix & Shell Scripting | OpenShift Container Platform |Kubernetes **|** Autosys | Performance Optimization | Team Leadership | Change & Release Management | ITIL Processes

Technical Skills

- **Languages:** Core Java, SQL, Unix/Shell Scripting
- **Cloud Platforms:** AWS (Certified), Microsoft Azure (Certified)
- **Monitoring Tools:** AppDynamics, Datadog, Kibana, Autosys
- **Automation & CI/CD:** Jenkins, Git, Autosys, ServiceNow
- **Databases:** Oracle 19C
- **Operating Systems:** Windows, UNIX/Linux

Professional Experience

Capgemini – Pune, Maharashtra | Senior Consultant / Production Support Lead | Oct 2019 – Present

- Led and mentored a global team of 19 support engineers, driving collaboration, knowledge sharing, and operational excellence across time zones.
- Led end-to-end implementation of production support initiatives, including planning, execution, monitoring, and closure—aligned with business continuity goals.
- Managed production support and provisioning workflows for Discover Digital Exchange (E-Wallet) platform, ensuring 99.99% uptime and seamless onboarding for Apple Pay, Samsung Pay, Android Pay, and Card-on-File wallets.
- Explored automation opportunities and implemented observability dashboards using AppDynamics, Datadog, and Kibana—streamlining support processes and reducing Mean Time to Identify (MTTI) by 35%.
- Automated job failure handling and system health checks via shell scripting, reducing manual intervention by 40% and improving incident response time.
- Served as Incident Commander during high-severity outages, ensuring timely stakeholder communication, impact analysis, and root cause identification and conducted post-incident reviews and implemented continuous improvement initiatives to enhance system reliability and reduce recurrence
- Participated in Change Advisory Board (CAB) meetings, authored change tickets, and validated production deployments for compliance and readiness.
- Collaborated with DevOps and engineering teams to optimize CI/CD pipelines, improve deployment efficiency, and enhance system performance.
- Responded to business queries, performed requirement analysis, and delivered enhancements aligned with SLA commitments.

- Maintained support documentation, including SOPs, knowledge base articles, and training materials to ensure consistent support delivery.
- Received Customer Delight and Certificate of Appreciation awards for driving observability improvements and adopting SRE best practices.
- Provided training and functional support to team members and client business users, enhancing operational readiness and knowledge retention.
- Ensured compliance with industry standards and security protocols through regular patching, risk assessments, and mitigation strategies.
- Developed and executed project plans, defined tasks, timelines, and resource allocation; tracked KPIs to ensure on-time delivery and strategic alignment.

Capgemini – Pune, Maharashtra | Associate Consultant/Application Support Engineer | Aug 2016 – Sep 2019

- Resolved production incidents and coordinated with onshore business teams to ensure timely resolution and minimal impact.
- Delivered 99% SLA adherence for incident response and resolution across critical fraud detection systems.
- Managed and monitored Autosys batch jobs, disk space, MQ listeners, and application health using Jenkins and internal tools.
- Conducted root cause analysis and developed preventive automation scripts to eliminate recurring issues and reduce manual effort.
- Automated daily and monthly client reports, improving accuracy, timeliness, and reducing manual workload.
- Led service improvement initiatives to enhance monitoring, alerting, and deployment validation processes.
- Created and maintained change tickets, validated deployments for production readiness in alignment with CAB protocols and responded to business queries with enhancements aligned to operational goals.
- Mentored new team members, led team activities, and contributed to knowledge sharing and onboarding.
- Reported service levels and performance metrics to ensure transparency and continuous improvement.

Education

- M.Tech – Engineering Management, Manipal Institute of Technology, Manipal University (2015) – 8.49 CGPA
- B.Tech –Information technology, St. Joseph Engineering College, Visvesvaraya Technological University (2013) – 72.45%
- 12th – Science, MGM PU College, Karnataka State Pre-University Board (2009) – 78.33%
- 10th – General Education, Indrali English Medium School, Karnataka Secondary Education Board (2007) –91.20%

Certifications

- AWS Certified Developer – Associate
- AWS Certified Solutions Architect – Associate
- Oracle-certified-associate-java-se-7-programmer
- Microsoft Certified: Azure Fundamentals

Achievements

- Pat on the Back Award (Sep 2018) – Honoured for exceptional dedication and impactful contributions to team success.
- Rising Star Award (Apr 2019) – Recognized for leading automation initiatives that significantly improved operational efficiency.
- Customer Delight Award (Apr 2021) – Awarded for consistently delivering high-quality solutions and outstanding client service.
- GEM Award – Going the Extra Mile (Dec 2024) – Honoured for exceptional commitment to weekend interview panels alongside regular duties.
- Certificate of Appreciation (Mar 2025) – Commended for expertise in Datadog and developing dashboards that enhanced system observability and performance.
- WOW Award – Client Value Creator (Oct 2025)– Recognized for achieving AWS Certification and contributing to the Discover account roadmap.
