- Will be responsible to have weekly contact with the Discover Project Manager (Client) to update status on the multiple systems that he will be handling.
- Will be responsible to involve the Discover Project Manager (Client) on adhoc basis for any issues or critical issues which can impact the service line agreement of Discover Financial services. With external service provider as well as information being send out to credit bureaus.

At Capgemini, we work with some of the largest and most-recognized brands in the world. Time and again, our clients tell us that it is our people that set us apart from the competition. We naturally **strive to hire the very best talent**, and the position of Business Systems Analyst 2 is no different. Considered by Capgemini as an experienced professional position, the specific

[Add the company legal information here]

job duties that the Beneficiary will perform as a Business Systems Analyst 2 require the theoretical and practical application of a body of highly specialized knowledge. Normally, Capgemini requires no less than a bachelor's degree or higher in a computer and/or information technology field related to the position (such specific fields include Computer Science, Computer Engineering, Computer Management, Computer Information Systems, Management Information Systems, Information Technology, Electrical Engineering, Electronics Engineering, Electronic(s) and Communications Engineering, or another technical/functional field that is closely related to the specialty), as well as relevant, quality experience for this position. We find that this level of education and experience allow our employees to flourish in their roles and become difference makers for our clients who are some of the world's biggest companies.

As a global leader in consulting, technology services and digital transformation, Capgemini works with the world's leading brands to enhance and transform the way they do business. We do this with passion, and we do this by applying the human touch to business and technology. Naturally, some of our employees are assigned to work at a client location in order to fulfill Capgemini's services projects to our clients. Specifically, for this instant case, Rakesh Nayak Ramachandra, will be assigned by Capgemini to work at our client, Discover Financial Services offices located at 2500 Lake Cook Road, Riverwoods, Illinois, 60015, USA. Although the Beneficiary will work at a client work location, Rakesh Nayak Ramachandra will continue to be a Capgemini employee and will be assigned to another Capgemini project by Capgemini as needed.

While working at the client location, Rakesh Nayak Ramachandra will report to me, the Capgemini manager. I will be supervising and controlling Rakesh Nayak Ramachandra day-to-day work while at the client work location. I will be directly responsible for assigning work to the Beneficiary, monitoring and approving the Beneficiary's work products, administering time and pay, and assessing the Beneficiary's performance.

As the employer, Capgemini will, at all times, retain and exercise ultimate supervision and control over the Beneficiary as the employer. The client or its customers will not have the authority to control the Beneficiary's work, nor will they have the authority to assign the Beneficiary to a different employer or different client or to contract out the Beneficiary's services. Capgemini has the sole authority to hire, fire, promote and otherwise set the terms and conditions of Rakesh Nayak Ramachandra's employment. The Beneficiary is eligible for usual corporate benefits such as health insurance, paid vacation, etc.

Rakesh Nayak Ramachandra is uniquely well qualified for the position of Business Systems Analyst 2 with Capgemini. For the foregoing reasons, I respectfully request approval of the above-referenced H-1B petition.

Sincerely,

Rahul Vasta
Manager
Capgemini America, Inc.
